

Serie "Classic"

This instrument is very applicable in a wide range to substitute electrical resistances or to the experimental setting of resistance needed.

Technical data

Type: YD

Working position: to your choice

Class of accuracy: 0,5 or 1 according to IEC-51

Minimum value of the inner zero resistance: 0,06Ω

Loadability of built-in resistors: max. 0,5 W

Values to set: 9x1MΩ+9x100kΩ+9x10kΩ+9x1kΩ+9x100Ω+9x10Ω+9x1Ω

Safety: IEC-1010/ EN 61010-1 class 2, degree of pollution 2., CAT. III.

Protection: IP 20

Dimensions: 202 x 110 x 97 mm.

Weight: approx. 0,8 kg

Ranges	Max. load current
x1MΩ	0,7mA
x100kΩ	2mA
x10kΩ	7mA
x1kΩ	22mA
x100Ω	70mA
x10Ω	220mA
X1Ω	700mA

Ordering data:

Portable resistance decade

Type: **YD**

Class of accuracy: **0,5**
