

Serie "Classic"

This instrument is very applicable in a wide range to substitute electrical resistances or to the experimental setting of resistance needed.

Technical data

Type: YL

Working position: to your choice

Class of accuracy: 1 according to IEC-51

Minimum value of the inner zero resistance: $0,06\Omega$

Nominal voltage: 200V

Loadability of built-in resistors: max. 0,5 W

Values to set: 1-1,5-2,2-3,3-4,7-6,8-10-15-22-33-47-68-100-150-220-330-470-680-1000-1500 Ω -

2,2-3,3-4,7-6,8-10-15-22-33-47-68-100-150-220-330-470-680k Ω -1-1,5-2,2-3,3M Ω

Safety: IEC-1010/ EN 61010-1 class 2, degree of pollution 2., CAT. III.

Protection: IP 20

Dimensions: 202 x 110 x 97 mm.

Weight: approx. 0,7 kg

Ordering data:

Portable resistance logade

Type: YL
